

Screening protocol for parents

Say: "the writing in small letters you see at the top of the paper does not make sense. It is just a jumble of 15 little words that you know. Look at these little words; you don't need to read them."

Ask them look at the words and then stop them after 10-15 seconds.

Then read each question aloud, one at a time, asking the children to tick the appropriate box.

Please ensure that each child concentrates on their answers and has enough time to complete every question.
